

Aerial Mapping Solutions

Need data fast? For less cost?

James W. Sewall Company offers architect and engineering groups practical solutions to expediting their construction and design projects. With competitive pricing and rapid project turn-around, we can supply accurate, current data in a matter of days to meet a wide range of project requirements, from planimetric/topographic mapping to volumetric measurement, infrastructure location, and digital orthophotography. For over 50 years, we have provided our clients with high-quality aerial photography and photogrammetric mapping. One of the largest aerial mapping firms in the eastern US, Sewall has the staff and equipment resources to provide flexible, fast service at reasonable cost. The benefits of our expertise include:

High quality data. Highly accurate aerial photography, mapping, and digital orthophotography will help you design, develop, and manage your projects wisely. Our airborne GPS & IMU technology can significantly reduce ground control requirements.

Fast delivery. We offer rapid turnaround on mapping projects, dependent upon the date of acceptable survey control and photography.

Competitive pricing. Ask about our pricing based on specified scale, film color, pixel resolution, and contours. For most project areas, we can develop a cost estimate within hours to facilitate your project planning or proposal preparation.

Reliable service. We will continue to provide the value that you expect from Sewall. Knowledgeable staff, advanced equipment, and 129 years of experience will ensure the success of your project.

For additional information about how Sewall can meet your mapping needs, please contact Clarence Young, Senior Project Manager, at 207 827 4456; Email: clarence.young@sewall.com

COMPREHENSIVE SERVICES

Aerial photography
LiDAR collection & processing
Preliminary wetlands location
Planimetric/topographic mapping

Utilities infrastructure mapping
Digital orthophotography
Photo interpretation
Digital terrain modeling

Highway design
Volumetric mapping
Watershed mapping
Wastewater mapping
Environmental mapping
