Hydraulic Modeling

System Design

For more than a century, Sewall has been providing engineering services in the Northeast, establishing a reputation for superior design and construction management of water and wastewater facilities.

Our engineering professionals bring broad capabilities to water and wastewater projects and have successfully completed a range of projects including those involving water supply and distribution, pump applications, storage facilities and treatment facilities and troubleshooting.

- Water/Wastewater GIS development
- Utilities infrastructure mapping
- System improvement and acquisition studies
- Watershed and wellhead delineation and protection studies
- Hydraulic modeling and hydrologic analysis
- Design, inspection, and construction management
- Environmental permitting
- Funding application assistance and strategy
